

END OF DARKNESS

WHITEPAPER

www.endoffgame.com

1. Introduction

End of Darkness is an online strategy game set in a zombie-infested region. In the game, you level up by developing your characters and collect rank points. The rating points you collect are the most valuable thing in the game.

This game, where you will have fun and exchange safe tokens, will give you a unique excitement. Hurry up, be a partner in this excitement!

2. Problem Reporting

Identification of existing limitations and challenges in traditional games:

Traditional zombie games often suffer from limited player engagement, lack of real ownership of in-game assets and lack of meaningful interactions beyond the virtual environment. Players want a deeper connection and tangible benefits from their gaming experience. This is where the integration of NFTs comes in, offering a solution that not only addresses these challenges but also opens up a world of possibilities for player empowerment and engagement.

3. Solution

End Of Game Explanation of how End Of Darkness leverages NFTs technology:

End Of Darkness offers an innovative solution by combining the fascinating world of zombie games with the potential of NFTs. Each zombie character becomes a unique experience using NFT-powered maps and missions. This integration gives players true ownership of their in-game assets, allowing them to trade, customize and participate in a vibrant player-driven economy.

The result is a dynamic gaming environment that goes beyond traditional games and offers players an immersive experience that rewards skill, strategy and creativity.

4. Roadmap

Step 1: Q4 2022

- Team Building
- Create Roadmap
- Game Scenarios

Step 2: Q1 2023

- Game Testing
- Report Generation

Step 4: Q3 2024

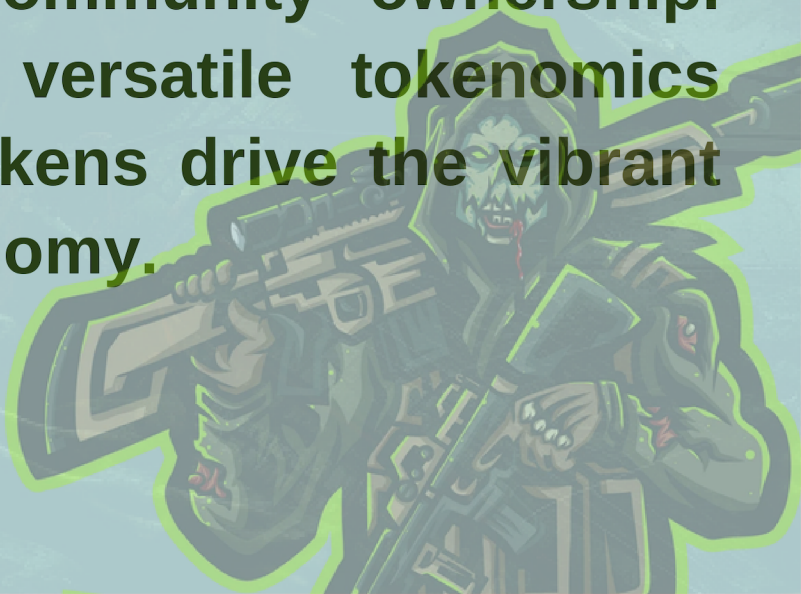

- Live Version 1.0.1
- NFT Marketplace
- Marketing & Network

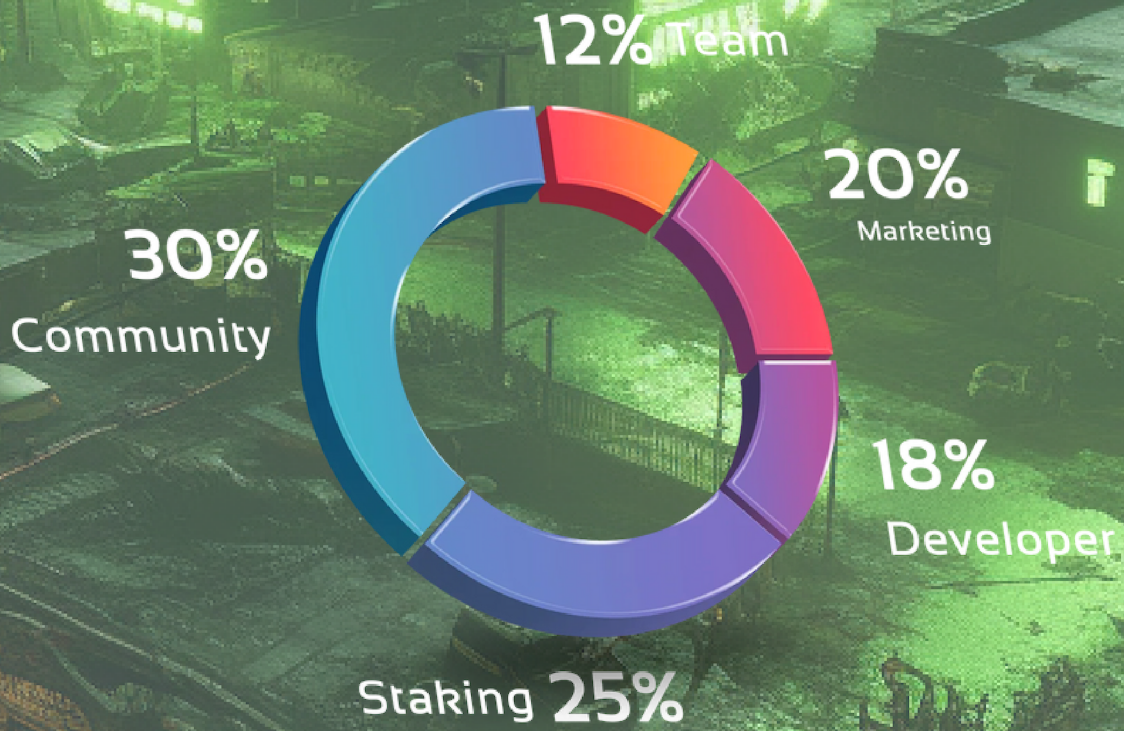

6. Tokenomics and Economy

A comprehensive exploration of the AINVDIA token and its role within the End Of Darkness ecosystem:

The AINVDIA token serves as the lifeblood of the End Of Darkness ecosystem, empowering players with unprecedented utility. The token allocation distributed across various categories ensures a balanced and sustainable ecosystem. Beyond its use in train operations and NFT transactions, AINVDIA tokens provide staking rewards that incentivize long-term holder engagement. Token holders actively participate in governance decisions and foster a sense of community ownership. With an open and versatile tokenomics structure, AINVDIA tokens drive the vibrant End Of Darkness economy.

Tokenomic

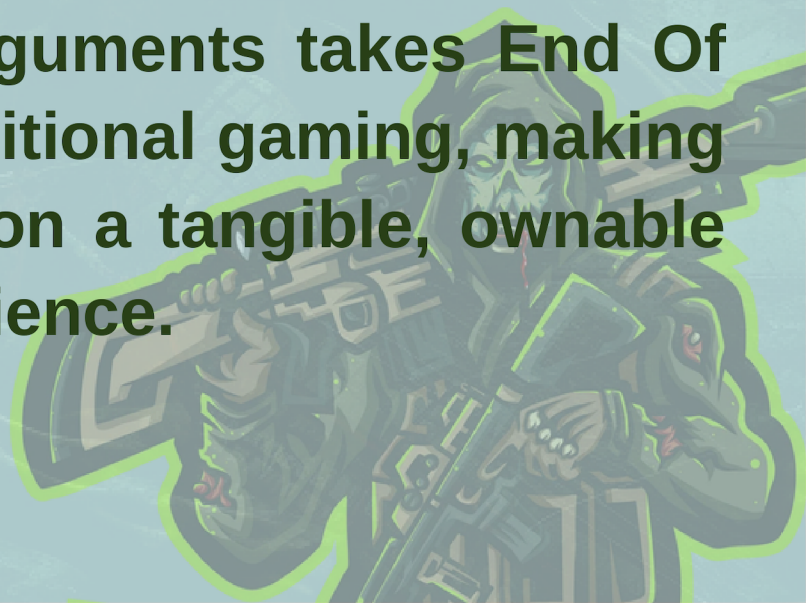

TOTAL SUPPLY: 5.000.000.000

7. NFT Integration

A detailed overview of how NFTs are integrated into End Of Darkness, including zombie NFTs, customization options and zombie battles:

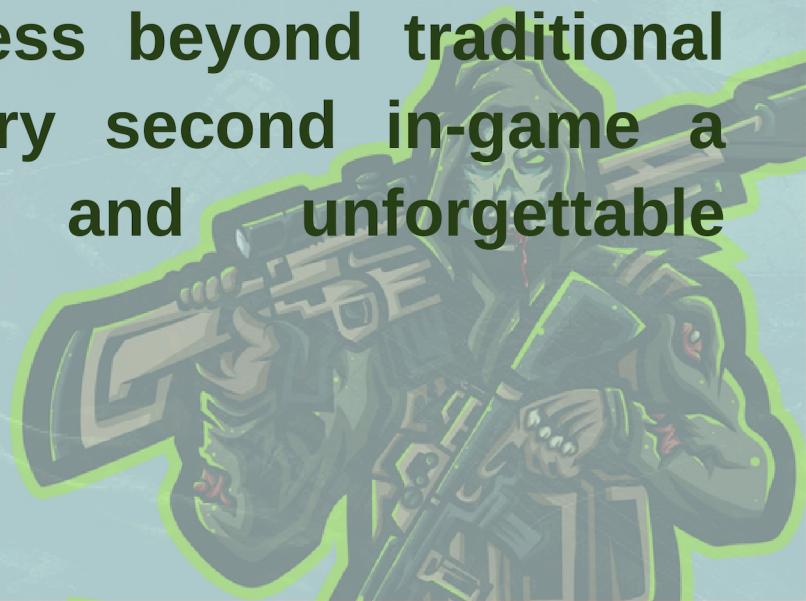

NFT integration is at the core of End Of Darkness' innovation. Players can collect and own unique zombie and map NFTs, each with different attributes and abilities that affect zombie battle outcomes. These NFTs can be traded, sold or customized, enhancing the personalization aspect of the game. Furthermore, zombie battles bring a new dimension to the game, allowing players to compete for victory using customized arguments. The combination of NFTs and in-game arguments takes End Of Darkness beyond traditional gaming, making every combat operation a tangible, ownable and memorable experience.

8. Community Engagement and Governance

A detailed overview of how NFTs are integrated into End Of Darkness, including zombie NFTs, customization options and zombie battles:

NFT integration is at the core of End Of Darknesii's innovation. Players can collect and own unique zombie NFTs, each with different attributes and abilities that affect their character power. These NFTs can be traded, sold or customized, enhancing the personalization aspect of the game. In addition, zombie maps add a new dimension to the game, allowing players to compete for fun using customized maps. The combination of NFTs and map mechanics takes End Of Darkness beyond traditional gaming, making every second in-game a tangible, ownable and unforgettable experience.

9. Partnerships and Collaborations

Exploring potential partnerships with other GameFi projects, platforms and influencers to develop the End Of Darkness ecosystem:

The End Of Darkness project recognizes the power of collaboration in building a robust and interconnected GameFi ecosystem. By establishing strategic partnerships with other GameFi projects, platforms and influencers, End Of Darkness aims to build synergistic relationships that expand its reach and impact. Collaborations allow for cross-platform promotions, interoperability and shared user bases, enabling a holistic gaming experience that transcends individual boundaries.
